Messrs Jordan Smith & Co. Ltd

Dear Sirs, Thank you for yours of the 29th ult. I have carefully gone into the question & examined the plans, the last I have shown, & am in agreement with the following points which materially improve the existing

Move the 3rd Pipe 2" towards way from wall.

" 5th " 6 " " " 4 "

" back towards the tower Screen from the front face.

" 6th Pipe 4" towards other Pipe the 7th in an

inward

" 7th " 6" from the 6th Pipe Table hole.

I trust you will find these suggestions possible. May I also suggest that you have caps to the Pipes first, that you will give the Foundations a final Lightening, as by now, it may be have settled down.

Thanking you in anticipation,

Yours faithfully
