

6. Manningham Rd

Deane

Bolton.

Lancs.

Sept. 6/55.

Mrs. John Taylor & Co.

Dear Sirs, I thank you for yours of the 5<sup>th</sup>. inst., & note your remarks. I am not agreeable to call in any local firm to put this matter right. It has taken me about 20 years to convince the P. C. C. that Bell-hanging and its associate work is a job for bell-hangers. I should soon be in trouble if I did engage an outsider after what I have said in the past.

I am afraid I must say that you do not seem to give the service one would expect in regard to maintenance, when a peal has been re-hung in a new frame. I would not expect the fittings to be dropping off if nuts were properly tightened in the first instance.

I should be obliged if you would get your representative to call at his early convenience, as one or two members of the P. C. C. and other ringers are surprised to hear that we can only ring seven bells so soon after the installation of the peal,

yours faithfully

M. Crook
